boss

“

BOSS Club is the perfect follow up to the BOSS Diploma in Digital Orthodontics. Being an absolute beginner in orthodontics the BOSS PG Diploma gave me all the foundational knowledge I needed in good diagnosis treatment planning. BOSS club provided me with ongoing mentorship and confidence to take on cases with easy to moderate complexity. The most useful part of BOSS club is the one to one portal with Dr Katyal. Dr Katyal was very prompt at responding to every single question I had throughout the year despite us being in deferent time zones! The 10 coaching cases really helped me consolidate the knowledge I had assimilated the previous year. BOSS Diploma and BOSS club together has provided me with invaluable knowledge and experience under a very carefully mentored setting and I would definitely recommend it to anyone looking to provide orthodontic treatment safely and effectively.

Dr Dhivya Mathew

DR. VANDANA KATYAL

SPECIALIST ORTHODONTIST

BDS (Syd), MScMed (Syd), DClinDent Ortho (Adel), MBA, MRACDS, MOrth RCSEd
Certificate IV in Training & Assessment - Mar 2021

Dr Katyal earned her Bachelor of Dental Surgery in 2001 and her Master of Science in Medicine (Clinical Epidemiology) at The University of Sydney in 2010.

In 2013 she completed her Doctor of Clinical Dentistry in Orthodontics from The University of Adelaide and Membership in Orthodontics, from the Royal Australasian College of Dental Surgeons and Royal College of Surgeons Edinburgh.

In 2019 she completed a Master of Business Administration and the world's most innovative Design Thinking bootcamp at Stanford University.

Dr Katyal is an avid lecturer at national and international orthodontic conferences. With a special interest in paediatric sleep-disordered breathing, snoring and oral appliances, her research has been published in orthodontic journals worldwide, and featured in mainstream media including Channel 9 news, ABC radio, 4BC radio, The Daily Telegraph, The Sun Herald and Bite dental magazine. In 2019 her research on virtual appointments and Invisalign was accepted as a poster at the American Association of Orthodontists Conference.

The recipient of prestigious orthodontics fellowships, she has also been awarded travelling fellowships by the Australian Society of Orthodontics Foundation for Research and Education, an honour shared with only the most distinguished Australian leaders in orthodontics.

AT BOSS WE BELIEVE IN EDUCATION AND BEYOND

Raising funds, raising smiles

As part of its partnership with the charity Smile Train, a portion of every BOSS course enrolment fee is donated to help deliver free corrective surgery for a child born with cleft lip and palate in a developing country. Since 2018 BOSS has already donated over \$10,000, which will transform the lives of children around the world by funding their cleft repair surgeries.

Local skills for global outcomes

By training local medical professionals in developing countries to operate on cleft, Smile Train is able to administer free cleft surgery and comprehensive cleft care every day. This is a safe and sustainable way of providing ongoing quality cleft treatment for a fraction of what it would cost a mission group.

Brightening futures

Cleft repair restores not only a child's face, but also their fate because, left untreated, they will face a lifetime of hurdles in terms of education, employment, and social acceptance. Smile Train can do for these children what their impoverished parents cannot.

Supporting Smile Train is a natural extension of BOSS's philosophy of spreading more smiles around the world, and we are proud that with every course enrolment we can continue helping this incredibly worthy cause. For more information on the wonderful work of Smile Train, go to smiletrain.org

CASE STUDIES FROM BOSS PAST ATTENDEES

CASE STUDY: Dr Annem Chaudhary, PGDip Dig. Orth. (UK) 2019 graduate

This patient used to be a thumb sucker and continued right on through till she turned 11. Her mother wanted to restore her daughter’s confidence and 6 months into treatment with Invisalign aligners has already got her grinning from ear to ear. She’s got a way to go still, but what a dramatic result so far! Dr Annem said ‘I’m really enjoying the impact BOSS has had on my treatment for kids!’

CASE STUDY: Dr Luca Pomare, PGDip Dig. Orth. (UK) 2019 graduate

Congratulations to Dr Luca for this well executed and finished case correcting an anterior crossbite of 16 year old with clear aligners in just 6 months! Well done on improving your orthodontic photography techniques at the end as well. Dr Luca is an avid learner of dentistry and we were glad to support his entry into orthodontics with BOSS courses. Join our 2020 Postgraduate Diploma in Digital Orthodontics and get going with impeccable treatments for your aligner patients!

CASE STUDY: Dr Vandana Katyal

Adult case treated with Invisalign. Treatment plan was to distalise upper left quadrant to allow upper left canine eruption. No TADs were required. Evidence shows that aligners are very predictable when moving upper molars bodily by 2-3mm. Be careful you don’t use TADs unnecessarily, be a biologically sensitive practitioner and understand evidence-based Clear Aligner Biomechanics.

PORTAL

FAQ'S

When can I start?

You can start at any time!

The Diploma is self paced and all content is available via a 24/7 e-learning portal.

What is digital orthodontics?

The dental world is very quickly becoming digital and clear aligners are digital orthodontics, overtaking fixed braces, which will be obsolete in years to come. Treatments are planned on the computer, predicted in advance and the next step is to have your treatments monitored remotely using the very latest in dental technology.

Why is BOSS for me?

As the dental world becomes more digital, the education has to move with the times in the same way to keep up. GP's don't have the same training as orthodontists and as a result we need to bridge that gap. BOSS teaches you everything you need to succeed in the new era of digital orthodontics, and is the only orthodontic diploma focusing on this in Australia.

Who is suitable for the Diploma in Digital Orthodontics online?

Any dental practitioner who is involved with, or has an interest in orthodontics. However, find it hard to take time off work and travel to Sydney.

I have no orthodontic experience, is the diploma right for me?

Absolutely, we all have to start somewhere, and this is the place to learn. Some of our students have been fresh graduates, and some have been practicing orthodontics for many years.

How much CPD is involved?

100 hours of CPD is available

I have no accreditation from a clear aligner company, does this matter?

Not at all, but we recommend getting this sorted soon as you will need this to treat your patients.

Is one-on-one coaching with Dr. Vandana Katyal included for the Diploma in Digital Orthodontics online?

No, there will be online group coaching sessions where you can bring your cases to and have a coaching session as a group. You will need to submit 2 case studies and we will proceed you with the template for the powerpoint presentation. You will have many opportunities in the group sessions to bring up any questions you may have.

DOWNLOAD FULL FAQ

RAVING REVIEW FROM PAST ATTENDEE

"I have only started the course a few months ago but have learned so much. The regular case discussion webinars are so insightful and Dr. V is extremely generous in her teaching. I like this course because most of learning is done online 24/7. I am really looking forward to the one on one coaching session and the in office visit to her clinic. Dr. V and her team is very responsive and helpful."

Dr Baotran Nguyen

WHAT PEOPLE ARE SAYING ABOUT THE BOSS COURSES

KIND WORDS FROM THE

“ I completed course 2 on clear aligners with Dr. Vandana Katyal this weekend in Melbourne. Having completed the initial Invisalign training course I was really excited to start, but didn't feel confident in selecting cases or how to critique the Clinchecks. Dr. Vandana's BOSS course gave me a much better insight into clear aligner systems, what they're good at and what they're not so good at. The biomechanics section was particularly useful, and she went over a lot of troubleshooting which I had no idea about previously. Would highly recommend course 2 for anyone starting out with invisalign or other clear aligners! ”

Dr James Zvirblis, Dentist NSW

“ I have been attending BOSS Courses since early 2016, and am so pleased to have found Vandana and her team! As Orthodontics is such a vast study in itself, BOSS breaks it down into practical and easy to understand concepts, which allows you to become more aware of the orthodontic status of all your patients. I have found so much confidence in being able to deliver orthodontic treatment to my patients after attending BOSS. If you're someone who hasn't done any orthodontics and are looking for starter courses, this course is fantastic. It is also a great opportunity for those who have had orthodontic experience in the past (like myself) to enhance, grow and learn more! ”

Dr Radhika Singh, Sydney
